

Sterilization Program

Hosted by WUFAW to provide high-volume, high-quality Spay/Neuter services in Central Vietnam in collaboration with a local veterinarian.

- Local veterinarians to provide spay/neuter services either at PAWS rescue center or at a vet hospital averaging 15 dogs per day.
- Monthly spay/neuter clinics to offer sterilization services for pet owners and stray dogs.

Reasons Why Spaying/Neutering is Necessary:

- **One female dog and her puppies can result in 67,000 dogs in six years.**
- **Cuts down supply for the Dog Meat Trade.**
- Spaying eliminates the stress and discomfort that females endure during heat periods, eliminates the risk of uterine cancer, and greatly reduces the risk of mammary cancer.
- Neutering makes males far less likely to roam or fight, prevents testicular cancer, and reduces the risk of prostate cancer.

Costs:

- **1 day = 15 dogs** **\$389.77**
- **2 days a month for 6 months = 180 dogs** **\$4677.24**

Costs include:

- Surgery and recovery
- Activity manager
- Vietnamese assistant
- Facility and transport costs
- Clean-up
